

[Mix & Match] Housed Condensers

Nominal Capacity 34.5kW to 83.6kW

BKB/BKFH Housed Condenser

Key Features

- C&C housed condensers are fitted with a fully weather-proof acoustically lined compressor housing keeping noise break out to a minimum.
- The compressor housing is fitted with an extract fan which removes excessive heat build-up (via an acoustic duct to minimise secondary noise emissions).
- The compressor housing can be supplied with the option of a compressor mounting cradle to suit customer requirements.

[Mix & Match] Housed Condensers

Nominal Capacity 34.5kW to 83.6kW

View of an acoustically lined compressor housing

Fins and Fans

- The condenser coils are coated aluminium as standard and are also available with the option of copper fins.
- All fans are EC technology type which offer variable speed control for optimum energy efficiency, performance and noise levels.
- Axitop diffusers are fitted to certain models in the range (denoted by the suffix A on the part number) which further reduce the energy consumption and enhance unit performance.

[Mix & Match] Housed Condensers

Nominal Capacity 34.5kW to 83.6kW

Isolator and Platework

- Condenser fans are fitted with mains isolator as standard wired back to a common junction box.
- All plate-work is constructed from heavy gauge galvanised steel with all external surfaces powder coated having excellent protection and an aesthetically pleasing appearance.
